

MICROTOPPING DECORATIVE COATING WARRANTY

The Microtopping industry uses color hardeners to strengthen and color the surface of the concrete. Color hardeners are designed for professional application only. Users are advised that satisfaction depends upon correct application of the product to a suitable substrate. Detailed application instructions and Material Safety Data Sheets are provided as part of our work. **TopCrete International S.A.R.L.** assumes no responsibility for misuse, improper application, and staining due to user carelessness and willful damage. By its nature, Microtopping coatings tries to emulate natural looking smooth concrete finish. Therefore it does not offer a homogeneous finish. Color and texture variations within the industry tolerances of 5-10% are to be expected.

TopCrete International S.A.R.L. warrants the high quality of its products. Our products are made of the finest material under rigid plant quality control supervision. However, because of many factors involving actual installation such as job conditions, workmanship etc.. the liability of all parties making and selling the end product is expressly limited to replacing any defective material prior to its application.

TopCrete International S.A.R.L. warrants its products against abnormal discoloration when applied according to our specifications and installation guidelines for a period of three years from application date with the exception of the natural aging process widely known and accepted in this industry. Since color stability is a factor of the cleanliness and the maintenance of the concrete finish, users should avoid using any chemical cleaning agents, acids, harsh detergents, and any other cleaning material that contains abrasive agents.
